

## **AMENDMENT NO. 1**

### **REQUEST FOR PROPOSALS: ELECTRIC BOATS**

Detroit/Wayne County Port Authority  
130 E. Atwater Street  
Detroit, MI 48226

**RFP Title:** Electric Boats

**Original RFP Issue Date:** June 10, 2026

**Amendment Issue Date:** June 23, 2026

### **Purpose of Amendment**

This Amendment No. 1 is issued to provide clarification to questions received regarding the RFP. The following responses modify, clarify, or supplement the original RFP requirements. All other terms and conditions remain unchanged.

### **Clarifications and Revisions**

#### **1. Beam Requirements**

**Original Requirement:**

Beam specified as approximately 8'–9'.

**Clarification:**

The Port Authority acknowledges that vessel size and design may result in beam dimensions outside the stated 8'–9' range, particularly for vessels in the 30–42 ft category. Vendors may propose configurations that meet operational requirements and performance intent.

#### **2. Seating Capacity Requirements**

**Clarification:**

Both vessel categories (under 30 ft and 30–42 ft) shall provide seating for eight (8) passengers. Seating configurations may include fixed, bench-style, or fold-up seating. Vendors are encouraged to propose creative and cost-effective seating solutions.

#### **3. Shock-Mitigation Seating**

**Clarification:**

A minimum of four (4) seats per vessel shall be equipped with shock-mitigating capability. This requirement applies to both vessels.

**4. Tow Post Location**

**Clarification:**

The Port Authority has not established a fixed requirement for the tow post location (bow or aft). Vendors shall propose configurations consistent with their design and operational best practices.
